

## Endorsed Testers

In order to qualify for testing under the HSDPT Alliance system, PDA Testers must be Endorsed.

To become Endorsed, PDA testing companies are required to :

- to undertake ongoing training,
- for all testing staff to achieve HSDPT certification either at tester or signatory level
- to maintain or upgrade their certification level (ideally to Advanced or above)
- to upload PDA test data to the secure hsdptalliance web site for random or systematic review as nominated by the Owner or Representative.

Endorsed Testers benefit from

- access to testing work from the Alliance Owners
- access to quality processes developed for the Alliance system
- random or systematic review, with feedback from experts and freedom from external influence
- reduced risk from better trained staff
